Title I, Part A Section 1116

Parent and Family Engagement

- Build strong family-school partnerships
- Engage parents meaningfully
- Achieve high standards

Research clearly indicates that parent involvement in their child's education has a significant impact on academic success. Our Family Math Night products engage families in ways that are linked directly to classroom learning. Parents work one-on-one with their child exploring hands-on, standards-aligned activities that reinforce what goes on in the classroom. They gain skills and strategies that can be used to help their child with math at home. When schools engage parents on an academic level, it underscores the role that parents have as active participants and valued partners in the education of their children...and learning increases.

Title IV Part A and B

Student Support and Academic Enrichment

21st Century Schools

- Provide quality educational resources and materials
- Include after school learning opportunities
- Increase student engagement

In order to succeed, all students need access to a well-rounded education. This includes educational experiences filled with hands-on activities that create an enriched environment. Our Family Math Night kits are a perfect example of this in action.

Each of our kits contain interactive and engaging games and activities that get students excited about doing mathematics. By integrating the arts and STEM thinking into our hands-on projects, students become more engaged, mathematical discourse increases, and student learning is enriched.
