

MATH AT HOME

Games

Dear Families,

Today in class we learned how to play the game:

Playing games is a great way to reinforce what your child is learning in the classroom. Not only are they fun, but games offer meaningful practice in engaging and motivating ways.

For homework tonight, your child will teach you how to play the game. As you play, you'll be helping your child:

- ★ reinforce basic skills
- ★ think strategically
- ★ develop mental math skills
- ★ communicate mathematically
- ★ build confidence

Along with the games is a **Check-in Chat** slip that lists the version I'd like you to play. The slip will also give you an opportunity to share thoughts about your experience playing the game. These thoughts are important to me as we work together to help your child develop a strong foundation in mathematics.

I encourage you to play the games together as often as you can. Playing often will help reinforce important skills and help your child become a confident math learner.

As always, please do not hesitate to contact me with any questions you may have.

Thank you for your support!
